EMAIL TOOL

Email Management

This tool allows a list of user to be collected from a variety of sources & databases.

This subscribers' list can then be imported into the system at start up.

Later a weekly/periodic list of subscribers is uploaded to the system.

A similar facility has been provided for un-subscribing users.

Also, using this tool, The Company's newsletter can be sent to the list of subscribers. (Management of bulk mail)

It allows for choosing of email servers which can be used to send bulk mails.
